Toys	\$1,10,839	\$30,382	5.09%
Mobile & Accessories	\$39,178	\$39,178	1.80%
Total	\$21,77,738	\$8,11,090	100.00%

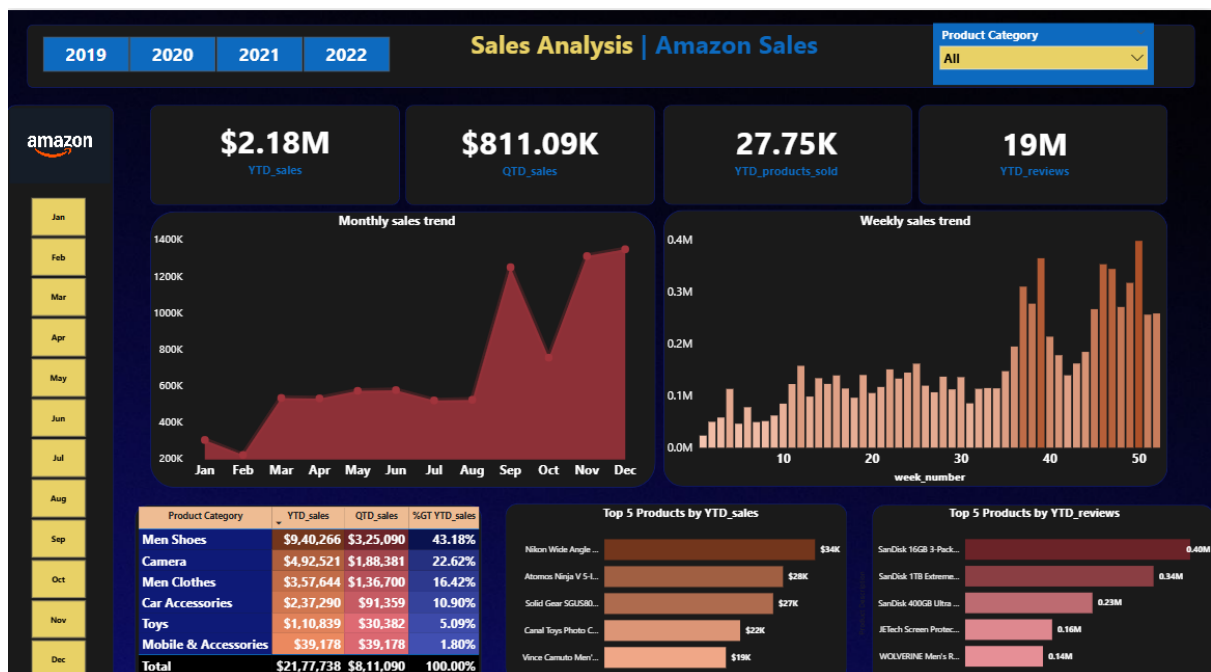

4. Top 5 Products in terms of year-to-date sales

5. Most reviewed year-to-date products

Amazon sales dashboard snapshot

Key Findings

1. Sales show a recurring seasonal pattern, with stronger sales observed during the later months of the year, particularly September, November and December.
2. Men Shoes and Camera are the dominant sales categories, contributing approximately 65.8% of YTD sales combined.
3. Toys and Mobile & Accessories have the lowest category contribution, accounting for approximately 6.9% of YTD sales combined.
4. The Top 5 products by YTD sales differ from the Top 5 products by YTD reviews, suggesting that review volume and sales performance do not necessarily move together.
5. Sales are concentrated in a small number of product categories, making the performance of the leading categories particularly important to overall sales.

Recommendations

1. Inventory Planning: Prioritize inventory planning for high-performing categories such as Men Shoes and Camera by monitoring demand patterns and stock availability.
2. Underperforming Categories: Investigate pricing, product assortment and customer demand for lower-performing categories before introducing targeted promotions or discounts.
3. Seasonal Planning: Align inventory and marketing activities with historically stronger sales periods, particularly September, November and December.
4. Off-Peak Marketing: Evaluate targeted promotional campaigns and customer re-engagement strategies during lower-sales periods such as the first quarter.
5. Category Diversification: Monitor the high concentration of sales in Men Shoes and Camera and explore opportunities to improve the contribution of other categories.
6. Measure Promotional Impact: Track sales before and after promotional campaigns to determine whether discounts and vouchers actually improve category performance.
